

Fixed Assets

Track your fixed assets with the simplicity of a scan!

Simply put, if you want to protect your bottom line, you need to maintain accurate records for your fixed assets. All too often, the physical details of your assets are managed outside of the accounting system and stored in spreadsheets or paper-based lists. Important questions, such as “who has it” and “where is it located”, go unanswered.

Gaining an accurate picture of your assets requires more than a few infrequent entries into the computer. It takes an entire solution that makes the tracking of assets simple -- a solution that contains barcoded asset tags, mobile barcode scanners, and a tight integration to the accounting system you already have. With PanatrackerGP, maintaining your asset details is easy. Better yet, you are accurately tracking these assets where you track their financial impact: Dynamics GP.

Add a barcode tag as soon as the asset is received. Update the physical details of your assets without risking direct access to Dynamics GP's financial details. Verify assets by location to confirm that your records remain accurate. Our unique platform allows you to synchronize asset details to the mobile computer and take it with you. Record updates where the assets are located and without a reliance on a continuous network connection.

“We now have a barcoded property tag on every laptop and server, and we can accurately track it as it changes hands. You have made this easy.”

PanatrackerGP is used in a variety of organizations to track both capital and expensed assets.

- + Schools
- + Government Agencies
- + Hospitals and Medical Facilities
- + Data Centers
- + Service Providers
- + Enterprise Organizations
- ... and more

Gain accurate control of your assets with Panatracker® GP.

Panatrack offers solutions that are powerful and can be implemented quickly. Consider adding our Inventory or Field Sales modules to complement your asset-tracking solution.

Fixed Asset Tracking for Dynamics GP

-  **Associate Asset** — Easily associate a new barcode asset tag to your existing assets. Filter the asset list by location, class assignment, or serial number to quickly locate and assign barcode tags.
-  **Add New Asset** — Tag it, scan it, and record key details about your new asset. Easily add the serial number, description, starting location, and more. Automatically create the corresponding receiving transaction if using a GP purchase order.
-  **Update Asset** — Access important asset details with a simple scan of the barcode. Quickly assign or re-assign who has it and where it's located. With support for GP's user-defined fields, you can tailor what information can be updated.
-  **Validate Assets** — Like a "physical inventory" for your assets, confirm that you have accurate location information for every asset. Find an asset out of place? Easily update the location on-the-fly and automatically log the exception.

About Asset Labels

Asset tag identification plays an important role in an organization's ability to quickly correlate different sets of information about each asset. This necessitates each asset be uniquely identified. Panatrack recommends purchasing pre-printed serialized asset labels made with label materials and printing techniques that will ensure your asset identification will last as long as the asset itself. Include your company name for anti-theft and security identification. Prefer to print your own? We can get you set up with the tools you need: label design and printing software, a barcode printer, and the correct label stock. Panatrack can provide you with your total asset tracking system.

Gaining control of your fixed assets doesn't need to be difficult.

At Panatrack, we're all about making your fixed-asset management easier and more efficient.

It starts by listening to you and your goals. We offer consultative web demos to confirm our solution will be a good fit. We then identify a path to deliver a solution that simplifies your life and gets you a quick return on your investment. Paper-based tracking and redundant manual keying will be a thing of the past.

Why us?

- + Our solutions are designed to be scalable, flexible, and easy to support.
- + We don't just deliver a piece of software. We offer our expertise to execute practical and accurate fixed-asset tracking.
- + With our extensive knowledge in Dynamics GP, we help you leverage your current systems to your best advantage.
- + We listen as a partner, always thinking of how to improve your operations and our solutions.
- + Through our partnerships with barcode hardware leaders such as Motorola, Honeywell, and Zebra, we can deliver the total solution.

Unlock the power of Dynamics GP with PanatrackerGP.
